FREE AND OPEN SOURCE

When someone asks for your link, *they get it.*

Ahoy sends a friendly direct message the moment someone comments your keyword on a post or reel. Use it free on your own, or let us set it up for you.

See the two ways to start | How it works

Three small steps, and then you can step away.

You don't need to know how any of it works. This is the whole thing.

1

Connect your account

Link your Instagram professional account once. We never ask for your password.

2

Choose your words

Pick a post, the word people will comment, and write the message you'd like them to receive.

3

Let it run

Every comment is answered, and you can see exactly what was sent, skipped, or needs a second look.

Made to feel like you, not like a robot.

Your voice

Write every message yourself, with the person's name added so it reads personally.

Links you can measure

See which posts bring real clicks, without counting link-preview bots.

A clear record

Nothing disappears. Every message shows its status and the reason behind it.

Respect for your audience

Your data stays yours

Honest about the rules

People can opt out, and they're never messaged again.

It runs in your own accounts. Access tokens are encrypted, and we don't hold them.

It uses Instagram's official tools, and we explain Meta's policies in plain language.

Two ways to begin. Both are welcome.

The free version is the complete product. The setup service just saves you the technical part.

Self-hosted

$0

Free, with nothing held back.

- The full open-source engine
- Unlimited campaigns and messages
- Step-by-step guide with screenshots
- A built-in check that tells you what's wrong
- Friendly community help on GitHub

Start on your own

Done-for-you setup

[Setup price]

Paid once. No subscription.

- Everything in the free version
- We set up your Meta app and connections
- Installed on your own accounts, so you own it all
- Your first campaign built and tested with you
